

Carport Kits

Smart-Park Carport Kits are a smart move - protecting your car and increasing the value of your home at the same time!

Lyrebird's Carport Kits are:

- **Easy to build**

Our prefabricated carport kits come in two sizes and include everything you need to build it, with most components pre-cut and pre-drilled.

- **Distinctive**

Our many attractive and contemporary carport designs will make your house stand out on the block for all the right reasons. Choose from a bullnose, Smart-Arch truss, convex or concave roofing profiles.

- **High quality**

Our carport kits are made with F8/ MGP12 radiata pine which are structurally sound and treated with a Light Organic Solvent Preservative (LOSP) to H3 level (protection for components above the ground) to resist rotting and borers.

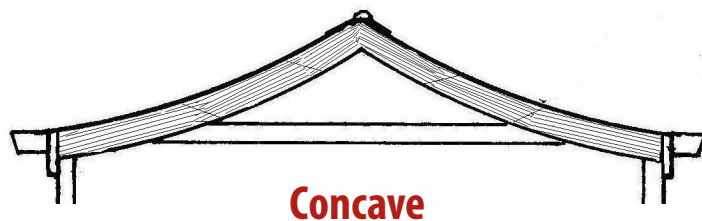

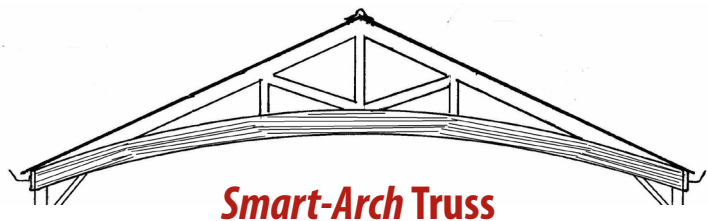

Our Carport Kits include everything you need

Made from clear pine with a sleek Colorbond roof, our carport kit includes:

- All carport framing components
- Colorbond roofing in your choice of colour (pick from our Colorbond colour chart)
- All hardware, gutter and downpipe
- Full building instructions - including framing plans that can be used to gain Council approval

- everything you need to build one of our distinctive carports in a day or so! Larger carports will require more time of course, but you'll be surprised how quickly it all comes together.

Choose from our four roofing profiles

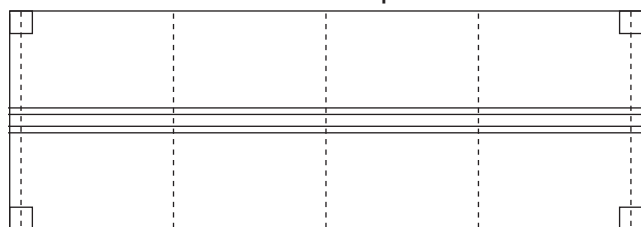

Standard Carport Kit sizes

Choose from our prefabricated sizes:

Standard Carport

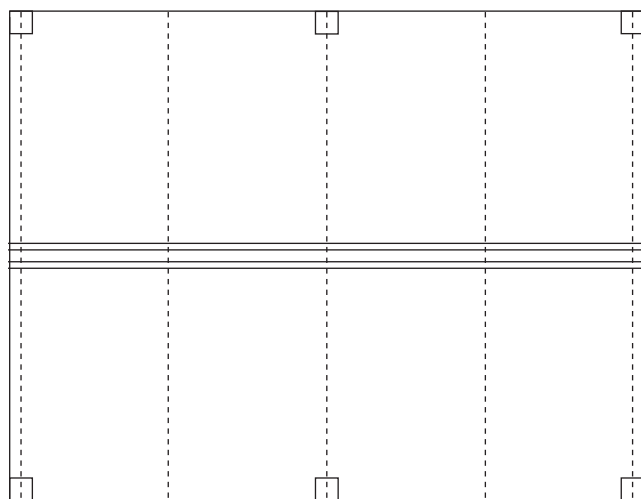

Depth 5.3m

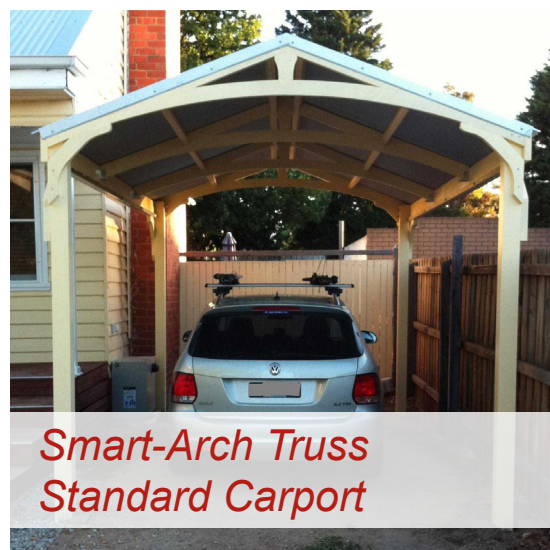

Width 3.0m

Double Carport

Depth 5.3m
