

## Patios

Liven up your outdoor entertainment area with a beautiful and unique *Smart-Arch* truss or *Curved-Arch* patio

### Why build a patio?

#### Add value to your home

Adding a patio adds great value to your home, as you are effectively adding an extra room onto your house. Keep your money in your pocket when you re-finance or sell - and enjoy the extra room until then!

#### Gain an extra living room - an outdoor living room

Gain an additional room that's full of air and light. Patios provide welcome shade during summer and protection from wet weather in the cooler months.

Bring the indoors, outdoors and enjoy your entertainment area in any weather. Want a BBQ? You won't need to wait for sunny weather any longer.

#### They look lovely!

Patios are an attractive addition to your home and mean that you can enjoy your garden more often. They're also a great place for kids to play!

## Lyrebird's *Smart-Arch* patio or pergola trusses:

- **Make building your pergola or patio easy**

With prefabricated trusses, your patio or pergola project will be well on its way quickly and easily.

- **Are strong AND attractive**

The beauty of natural wooden beams is so much more attractive than cold metal beams! Lose the ugly beams whilst keeping their strength. Lyrebird's *Smart-Arches* for patios and pergolas are made to high quality standards using F8/MGP12 radiata pine and can be LOSP treated if you want to keep the natural timber look.

## Curved-Arch patios and pergolas

### How large an area do you want to cover?

If you're looking for a patio or pergola that's totally unique, call us! Our patio and pergola *Smart-Arch* trusses and *Curved-Arches* come in a variety of sizes and spans. Just let us know the dimensions of your patio or pergola project and we will custom manufacture a smart new addition to your home.

Smart-Arch Truss - Up to 4200mm wide

Smart-Arch Truss - Up to 7200mm wide
