

Window Canopies / Awnings

Lyrebird make a range of sturdy, solid pine window canopies that will cool your rooms, save you money and add a stunning feature to your home.

Why install a Lyrebird window canopy?

- **Reduce your energy bills** - A window canopy will keep your rooms cooler in summer and warmer in winter, so that you can turn off your air conditioner or heater and save on electricity costs.
- **Stop unwanted weather reaching the window** - No one likes scrubbing the windows! With a Lyrebird timber window awning, you won't need to. You'll also extend the life of your window sills and frames, as they won't be subjected to as much weather wear.
- **Stop sun bleaching** - Curtains, bed covers and cloth furnishings are expensive. Make sure that yours last longer, keeping them protected with a Lyrebird window canopy.
- **Are a fast and inexpensive way to add a stunning feature to your home** - Improve the resale value of your home and enjoy the envious stares of your neighbours. Within as little as 1 hour you can install a Lyrebird window canopy and not only enjoy the benefits they bring, but also add a attractive feature to your home (wider windows will take a little longer).
- **Are made to last** - Our window canopies are made using radiata pine and treated with Light Organic Solvent Preservative (LOSP) to H3 level (protection for components above the ground), to resist rotting and borers.

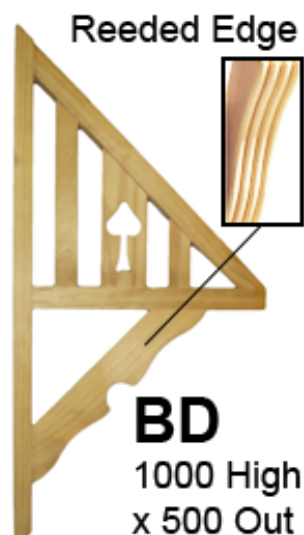

Window Canopy Kits

Lyrebird supply complete window canopy kits, containing:

- 2 x window canopy brackets in the profile of your choice
- 2 or 3 angled battens, to suit window width
- Colorbond / Zinalume Miniorb (ripple iron) or BlueOrb corrugated steel in the color of your choice
- Top and side flashings
- Bolts and screws etc.
- Full installation instructions

Window Canopy Profiles

Ordering Information

When ordering your window canopy kit, please have the following information at hand:

- **How wide is your window?** - Lyrebird window canopy kits cover windows to **1100, 1600, 2300, 3200, 4000mm**. For example, if your window is 2100mm wide, you would order a 2300mm wide kit, and trim the battens and flashing to suit. Note: Measure your window frame **outside to outside**.
- **What will it be attached to?** - Please let us know if the window canopy is going to be attached to a **brick** or **timber** wall, so that we can provide you with the appropriate screws.
- **What color colorbond would you like?** - Choose the colour of your window canopy roof and flashing from the colorbond colour chart found on our website at: http://www.lyrebird.com.au/window_canopies.html
- **When you are ready to order** - Contact us on **(03) 9707 4300** or email us on sales@lyrebird.com.au with your details and the above information and you'll soon be enjoying your new window canopies!
- **Please note** - Due to the LOSP treatment, an oil based primer needs to be used before applying acrylic paint.
